**Shortage of power and its effect on growth rate**

2157. SHRI PREM CHAND GUPTA: Will the PRIME MINISTER be pleased to state:

(a) whether it is a fact that shortage of power affects the growth rate of all key indicators and thus the G.D.P.; and

(b) whether the all India shortage is 18%, what is the impact of this on G.D.P.?

THE MINISTER OF STATE IN THE MINISTRY OF RAILWAYS, MINISTER OF STATE IN THE MINISTRY OF PARLIAMENTARY AFFAIRS AND MINISTER OF STATE IN THE MINISTRY OF PLANNING AND PROGRAMME IMPLEMENTATION (SHRI RAM NAIK): (a) Yes, Sir

(b) The power supply position at the end of Annual Plan 1997-98 indicates 8.1% shortage in energy and 11.3% shortage in peak demand at all India level.

Electricity is one ot the key inputs for the growth of industrial and agricultural production which are major components of GDP growth. The growth of economy, expressed as percentage annual increase in GDP, calls for sustained growth of power sector. The growth rate of demand for power in developing countries is generally higher than that of GDP. However, it is difficult to establish any firm empirical relationship between the shortage in power availability and the level of GDP.
